## PREFACE

This volume contains the official record of the International Congress of Mathematicians held in Stockholm from 15 to 22 August 1962, and the text of the addresses given by invitation of the Organizing Committee. Manuscripts were prepared for printing by Dr. V. STENSTRÖM who also read the proofs. The short communications made by members at the Congress are not included in the *Proceedings*, but the names of the communicators and the titles of their papers will be found in the section giving the scientific programme. Summaries of these contributions, if received in time, were printed in *Abstracts of Short Communications*, issued to members during the Congress.

Stockholm, June 1963.
